Security & Detection Systems

**ProVision Whole Body Imager screens personnel using safe, active millimeter wave radio frequency technology to detect concealed objects hidden under clothing.**

**SAFE**

- 10,000 times less powerful than a cell phone, similar to watching your LCD TV
- No X-rays, no ionizing radiation

**FAST**

- Two-second scan time for a complete multi-directional view
- Scans 300–600 people per hour depending on application

**EFFECTIVE**

- Detects all types of materials: liquids, gels, plastics, metals, ceramics, etc.
- Detects all types of objects: weapons, standard and home-made explosives, contraband, drugs, money, papers, etc.

**MAJOR DEPLOYMENTS:**

L-3 has more than 100 ProVision whole body imagers worldwide.

**Airports:** In-test or operational around the world in Europe, Asia, Russia, the U.S.A. and now Canada for passengers, employees, flight crews and customs.

**High-threat Facilities:** US federal, state and foreign courthouses; National Laboratories; Embassies and other government buildings and corporate offices.

**Customs and Borders:** Border crossings in the Middle East.
